

## Week 10: Group Status Report

Bryan Muller, Peter Flickinger

March 16, 2019

We were able to gather all the data from Canvas that we wanted to use. We have just over 3100 rows of student grade data we will be using. We are now in the process of manipulating the data and adding some additional calculated columns, such as average teacher grade, gpa, past course grades etc. Once those columns have been added, will be ready to anonymize and train the model. I would claim that we are on schedule.
